Adaptability, Quick learner,
Communication

PROJECTS

Solscan Lite– React Native Mobile Application

- Developed a mobile blockchain explorer to track wallet activity on the Solana network.
- Integrated Solana Mobile Wallet Adapter for secure wallet connectivity.
- Implemented features to fetch token balances and recent transactions using Web3 APIs.

Praman– Blockchain Based Certificate Issance and Verification Platform

- Built a decentralized platform for issuing and verifying digital certificates.
- Implemented smart contracts to ensure tamper-proof and secure certificate validation.
- Designed verification mechanisms to improve trust and transparency in credential systems.

Personal Portfolio Website (dnyanesh-one.vercel.app)

- Implemented structured routing and optimized performance using Next.js.
- Integrated contact functionality and project linking for easy navigation.
- Deployed and managed production build using Vercel.

Trello Board (<https://trello-board-1-f9zi.onrender.com/>)

- Designed and developed RESTful APIs for a project management platform to track tasks across multiple boards.
- Implemented CRUD operations for boards, lists, and tasks with proper data relationships.
