PROJECT / INTERNSHIP EXPERIENCE

Dust Data and Decision: Air Quality Prediction and Analysis using ML & DL

CURRENTLY
WORKING

- Developed an AQI prediction system using XGBoost and Bidirectional LSTM on multi-city air pollution datasets.
- Analyzed pollutants like PM2.5, PM10, NO₂, SO₂, CO, and O₃ using spatio-temporal data analysis techniques.
- Achieved high prediction accuracy with strong R² scores for reliable air quality forecasting and monitoring.

NASA Space Apps Challenge 2025

OCT-2025

- Created a child-friendly project explaining space weather through storytelling and visuals. Showed how solar activity impacts communication, power systems, farming, and space missions. Designed interactive content to inspire curiosity about the Sun-Earth connection and space science.
- Proud to share that our project was selected as the Local Winner in NASA Space Apps Challenge 2025 and ranked among the Top 10 teams.
